Window Protection and Security

# KEEP DANGER OUT

WWW.DEFENSELITE.COM

## **DEFENSELITE™**

### **DESIGNED TO PROTECT OUR CHILDREN**

**DEFENSELITE** retro-fit glass protection systems keep the bad guys out. Applied directly to a school's existing doors and windows, the innovative system costs far less than replacing windows and doors with specialty glass.

### **NO ENTRY, NO HARM**

**DEFENSELITE** now protects over 800 doors and windows in the Sandy Hook region. This tragic massacre was over in 6 minutes. The assailant simply walked up, shot out the glass and entered the locked building. With **Defenselite** installed he could have been stopped cold.

### **ADVANTAGES OF DEFENSELITE**

**DEFENSELITE** is virtually invisible. It is designed to keep our schools from looking like armed camps. **Defenselite** is bonded to the window and door frames using **Defenselite Super Bond (DSB)**. There are no mechanical fasteners needed. Installation is fast, non-disruptive and economical.

**DEFENSELITE** reduces interior sound levels - a huge benefit for schools. It also adds a layer of insulation to existing windows while reducing HVAC costs.
